## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE three MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 25, 2003 (Paper N<sup>o</sup> 11) has been entered.

### ***Preliminary Remarks***

2. This Office action responds to the amendment and arguments filed by applicant on November 25, 2003 (Paper N<sup>o</sup> 11) in reply to the Office action mailed September 22, 2003.

3. The amendment of claims 1, 14, 15, 20, and 22 in Paper N<sup>o</sup> 11 is hereby acknowledged.

### ***Response to Amendment***

4. The amendment submitted November 25, 2003 (Paper N<sup>o</sup> 11) fails to comply with 37 CFR 1.121(c) because it presents currently amended claims 15, 20, and 22 as "[Previously amended]" (claim 15) or "[Previously presented]" (claims 20 and 22) instead of--[Currently amended]--. The necessary correction has been made and the paper entered, but all future amendments must comply with 37 CFR 1.121.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-3 and 14-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gardner et al. (US 5,758,327).

Gardner et al. disclose a method for creating a valid chart of accounts from which an administrator of a local enterprise can facilitate and enable a requisitioner to select a valid account, comprising the steps of: establishing a communication link 30 with an external enterprise catalog system 12; transmitting 36 from the enterprise catalog system 12 a chart of accounts to a requisition catalog system database 10, it being deemed inherent that the format on the local enterprise system would be specified by the local system; selecting from the requisition catalog system database 10 valid accounts with descriptions for a given commodity (see, in particular, column 5, line 57, to column 6, line 13); and, associating 50 a selected account/description tuple with company commodity groups for use in a requisition creation process (see, in particular, column 6, lines 64-67), but Gardner et al. do not specifically disclose that the chart of accounts includes descriptions, nor that the valid accounts have a limited purchase period.

However, descriptions and valid periods (such as a name of the account and a particular valid fiscal year) for accounts are well known, hence obvious, elements to include in any system of requisitioning accounting.

Therefore, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to have modified the method of Gardner et al., so as to include account descriptions and periods, as is well known to do, in order to facilitate selection of the proper account to which to charge a particular requisition, since so doing could be performed readily and easily by any person of ordinary skill in the art, with neither undue experimentation, nor risk of unexpected results.

Regarding claims 2, 16, and 18, the method of Gardner et al. includes the requisitioner 18 searching 40 against commodities and catalogs 24, 26, 28 in commodity description documents and, responsive thereto, creating one or more line items (see col. 5, line 61, to col. 6, line 13).

Regarding claims 3, 17, and 19-23, the method of Gardner et al. includes the requisitioner initiating a proceed to accounting process which displays lines item(s) selected by the requisitioner and an agent created financial worksheet (see, in particular, column 6, line 27, to column 9, line 56). Gardner et al. also disclose the use of commodity codes (see, in particular, column 5, lines 57-61), but do not specifically disclose the recited details of the descriptions of each commodity code. However, the recited elements of the commodity code descriptions are all well known, hence obvious, elements to use in any commodity code descriptions. Therefore, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to have

further modified the method of Gardner et al., if required, so as to include the particular non-functional descriptive material recited by the claim, in order to describe each particular commodity code in detail so as to facilitate selection of the proper commodity code, since so doing could be performed readily and easily by any person of ordinary skill in the art, with neither undue experimentation, nor risk of unexpected results.

*Response to Arguments*

7. Applicant's arguments filed November 25, 2003 have been fully considered but are not persuasive.

8. Regarding the argument that Gardner et al. is referring to, in column 5, line 57, to column 6, line 13, activities performed by the requester, rather than by the administrator as claimed by applicant, it is indeed the administrator in the method of Gardner et al. that performs the claimed activities, associating valid account codes from the global chart of accounts with specific commodity codes. See, for example, column 5, lines 57-60, stating that the "storing of the catalog" [by the administrator, since that is who is doing the storing] "may include storing commodity code structures and charts of accounts for the companies 12, 14, and 16" [i.e., for the requester(s), since the requesters 18, 20, and 22 are employees or principals at the companies 12, 14, and 16]. See column 4, lines 45-50.

9. Regarding the arguments at the lower half of page 13, that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., that the administrator is the buyer, and that subsetting into subsets is performed) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Moreover, the first of these arguments, that the administrator is the buyer, directly contradicts the arguments at the top half of page 13 (as well as the claims and specification), stating that the administrator is a different entity from the buyer, "[the administrator taking actions] to make the buying experience easier for the requester."

### ***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to the disclosure.

11. Any inquiry concerning this communication, or earlier communications, should be directed to the examiner, **Jerry O'Connor**, whose telephone number is (703) 305-1525, and whose facsimile number is (703) 746-3976.

The examiner can normally be reached weekdays from 9:30 to 6:00.

Inquiries of a general nature or simply relating to the status of the application should be directed to the receptionist, whose telephone number is (703) 308-1113.

If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Mr. Robert Olszewski, can be reached at (703) 308-5183.

Official replies to this Office action may be submitted by any *one* of fax, mail, or hand delivery. **Faxed replies are preferred and should be directed to (703) 872-9306** (fax-back auto-reply receipt service provided). Mailed replies should be addressed to "Commissioner of Patents and Trademarks, Washington, DC 20231." Hand delivered replies should be left with the receptionist on the seventh floor of Crystal Park Five, 2451 Crystal Dr, Arlington, VA 22202.
